

TRIPLE MULTI NEEDLE LINEAR BORDER MACHINE

TRIPLE MULTI NEEDLE LINEAR BORDER MACHINE

High speed machine for straight quilting layers of different materials for mattress side panels.

Composition

The machine includes three sewing heads in line. These are KANSAI DFB 14-12 each with 12 needles. The machine is also equipped with a material guiding system, high performance edge trimmers, mobile yarn creel, creel for the various materials to be quilted and a roll up for the finished product.

Main features

- KANSAI DFB 14-12 sewing machines are efficient with production speed up to 20M/min. Side panels up to 30cm wide can be made.
- Adjustable tension and sewing speed on each sewing head.
- The sewing machines are mounted on slides for easy setting and maintenance.
- Pneumatic locking guarantees accurate positioning of the sewing machines.
- Pneumatic control of the feed rollers enables the machine to be set up quickly and efficiently.
- Montenero edge cutters are robust and efficient, cutting cleanly through a wide range of materials.
- The yarn creel is mounted on castors for easy movement and maintenance.
- The creel for the various materials to be quilted is easy to operate and adjust.
- The roll up unit is fitted with tension adjustment to accommodate a range of products.
