

# WHO IS THE ENEMY OF YOUR BUSINESS?

## YOUR COMPETITORS?

## YOUR QUALITY?

The Cason bobbin stripping machines are definitely one of the allies that can help you win the commercial war based on pure price.

The leading Italian textile industries have chosen Cason bobbin strippers to prevent their threads from being cut by the sharp rags generated by manual stripping.

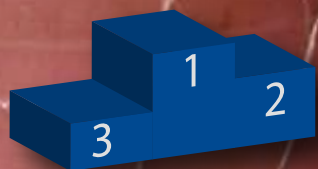

Thread breakage adds up to lower the overall quality of your production.

Cason bobbin strippers use a patented technology that prevents the cutting blade from touching the bobbin, thus maintaining the bobbin's surface smooth and intact as if it were new.

More than 2000 Cason bobbin strippers have been installed worldwide not only to reduce labour costs, but mainly to improve the overall quality of our customer's production.

### Cason bobbin stripper model AC/UNO
